# The API platform that changes the future of logistics

RAISE THE BAR

Elevate every shipment and interaction.

Whether you're managing freight for yourself, as a third party, or even trying to streamline your communications; we have the tools.

123LOADBOARD

INTERACTIVITY APIs

A seamless, consistent way to make things happen.

Putting together everything you need to communicate, haul, post, and accomplish your goals with an API developed to keep everything on track.

COMMUNICATION PLATFORM

Seamless messaging

Put an end to communication barriers by building messaging right into your product.

LOAD SEARCHING

Find loads

Search for loads posted by top brokerages and shipping companies in North America to keep your trucks on the road.

LOAD POSTING

Move freight fast

Post your loads to a network of over 100,000 qualified carriers and counting to ensure your load is hauled on time and in perfect condition.

RATE CHECK

Real rates, real-time

Negotiate your rates with confidence with our data that gives you a range of lowest, average, and highest rates specific to the lane and equipment you're looking for.

DOCUMENT MANAGEMENT

Send and receive

Exchanging logistics paperwork with ease is simpler than ever, ensuring that your documents are synchronized in your web and mobile applications.

TRUCK POSTING

Stand out

Post your truck anytime, anywhere; letting load posters know you're available and ready to haul.
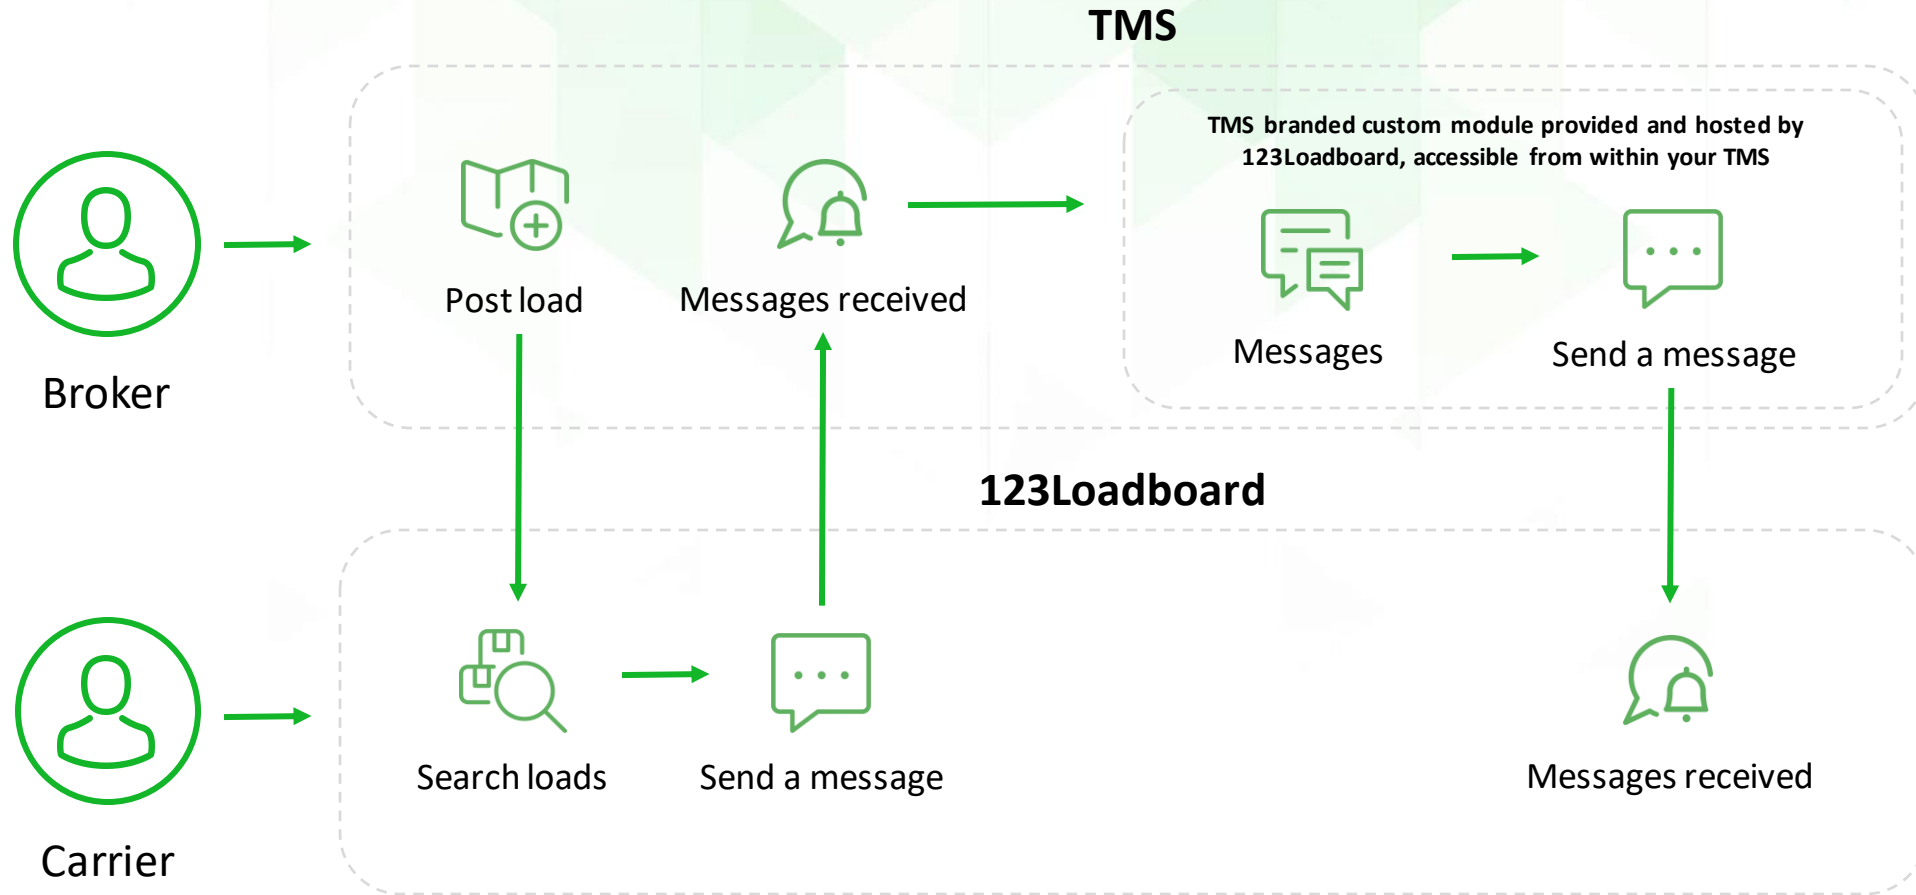

TRUCK LOCATOR

Find trucks

Take even greater control of your loads by contacting a nearby carrier directly to haul your load.

API Integration roadmap

1

Ready to get started?

Finalize business requirements by management

2

Finalize technical requirements by developers

3

Development starts

4

Developers from both teams begin work

Development complete and ready for testing

5

Final approval

6

Ready to go live

Integration complete

7

123 LOADBOARD

User story #1

As a broker, I need to be able to post my loads and communicate with interested carriers through my TMS so all of my load-related communications are in one place.

TMS

TMS branded custom module provided and hosted by 123Loadboard, accessible from within your TMS
